Mangalore

Respected Sir,

Subject: Approval for Replacement of L&T 400A 4-Pole MCCB – Hostel Main Panel

An issue was identified on 20/08/2026 at around 2:00 AM with the 4-pole L&T MCCB of the small generator incomer in the Hostel Main Panel. On 20/08/2026 ^{10 AM} morning, while rectifying the issue, we found that one pole of the MCCB was not making proper contact.

To confirm the issue, we called the panel technician from Prasad Technologies. After inspection, the technician confirmed that the MCCB is faulty. The warranty period has also expired (purchased on Jan-2025), and the MCCB is not repairable. Therefore, replacement of the 400A, 4-pole MCCB is required.

The estimated cost for the replacement is ₹43554/- including GST. Kindly provide your approval to proceed with the replacement.

Thank you.

Yours faithfully,

[Signature]
