Respected Sir,

Subject: Request for Approval for Rewinding of 125 kVA DG Alternator Stator and Replacement of Oil Seal

As per our request, the servicing work of the 125 kVA DG alternator was approved by you on 11/09/2026. Accordingly, Sri Mahalakshmi Winding visited the site on 18/09/2026, dismantled the alternator, and shifted it to their workshop for further servicing and inspection.

After dismantling and detailed inspection at their workshop, they reported that the stator winding was found to be weak and that rewinding of the stator is recommended to avoid further breakdowns and ensure reliable operation of the DG set. The possibility of this issue was already mentioned in the earlier approval request letter and quotation submitted for the servicing work.

In addition, Deccan Sales and service pvt ltd inspected the alternator and observed a minor oil seal leakage/issue. They have recommended replacement of the oil seal. Since the alternator is already dismantled and at the workshop, the oil seal can be replaced conveniently at this stage, avoiding the need for dismantling the alternator again in the future and helping to prevent further oil leakage.

Therefore, I kindly request your approval to proceed with the stator rewinding and oil seal replacement work.

The estimated cost
Sri Mahalakshmi winding-56994/-
Deccan Sales & Service Private Limited - 9564

Thank you.

Yours faithfully,
